***Allowable Subject Matter***

Claims 1-28 are allowed.

The following is an examiner's statement of reasons for allowance:

The cited prior art taken alone or in combination does not fairly suggest the claimed invention of updating values of variables in a binary content file without recompiling source code associated with the binary content file. Specifically, claims 1, 26 and 27 are directed to customizing a binary content file without recompiling source code, receiving a script file that includes reference to update values, updating values for one or more variables in compiled binary content file and processing the script file to change the current value of the one or more variable to the updated values for one or more variables in the compiled binary content file. Therefore, the claimed invention reduces recompilation process without modifying binary content files and increases granularity.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
